FOR IMMEDIATE RELEASE: 01.27.2020

Empire State Motocross is proud to announce a new and exciting partnership with MYLAPS Sports Timing for 2020!

That's right folks! ESMX is launching into the future with the addition of MX transponders at all our tracks in 2020.

Founded in 1982, MYLAPS supports athletes, racers and events in creating their ultimate sports experience. Every year MYLAPS captures the performance of over 20 million people all over the world. And turn their data into insights, progress and fun. They offer them a better understanding of their performance and help them with their best next steps.

*ESMX is focused on providing our riders the best quality, price and experience, to that end ESMX is offering an unheard of deal within the industry. Our strong partnership has allowed us to pass along this unprecedented deal to the riding community. It allows EXMX members to purchase the newest model TR2 transponder **and** 1 year subscription for only **\$45!** (With purchase of 2020 ESMX membership) This holds a normal value of **\$109!** If you choose to purchase additional transponders for each membership it will still only cost you \$70 per transponder. (Transponders will not be required for 50cc riders) Transponders will be for sale at our banquet in addition to upcoming sign up events leading up to our season opener. We encourage all to get your transponders before the first race to familiarize yourself with the app and device along with charging the unit. Plenty of units will also be available at each track and event for rental for a low daily fee of just \$5.*

The TR2 Transponder is the newest technology, complete with Bluetooth connection to your phone and the Mylaps app that will allow real time scoring and timing. Users will also be able to share results online and on social media, and transponders will make scoring and class protests more accurate. The units have a list of cool features and uses!

The rising cost of labor and wages all around NY state has affected every small business, MX tracks included! The promoter's investment in transponders will not only help keep our labor costs down, but also give our racers more value for their racing dollar! Empire State Motocross tracks haven't raised prices in the last five years, even as many of our expenses have increased, and we are committed to finding innovative ways to keeping them the same in 2020 and beyond! Please, if you have any questions reach out to anyone involved within the district and they are more than happy to discuss.

We are very excited and look forward to an incredible year of riding and racing! See you all soon.

*Sincerely,
The Board of ESMX*
